DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Rouget F. Henschel on 05/14/2004.

IN THE CLAIMS:

Claims 12-18 have been canceled.

Allowable Subject Matter

2. Claims 1, 3, 5, 7-11, 19-21, and 23-25 are allowed.
3. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 6,350,369 to Lewis et al. in view of 6,627,154 to Goodman et al. are references closest to the claimed invention. Lewis et al. in combination with Goodman et al. disclose a distributed sensing system in a networked environment for identifying an analyte, said system comprising: a first sensor array connected to said computer comprising sensors capable of producing a first response in the presence of a chemical stimulus; a second sensor array or single sensor connected to said network comprising sensors capable of producing a second response in the presence of a physical stimulus, wherein each sensor of said second sensor array

Art Unit: 2857

or said single sensor is an optical sensor, a mechanical sensor, a radiation sensor, a thermal sensor or combination thereof; a computer connected to said network; a computer readable algorithm for execution by said computer, said computer readable algorithm comprising instructions for comparing the first response and the second response with a known response, and instructions for identifying an unknown analyte. However, Lewis et al. in combination with Goodman et al. do not teach instructions for indicating or selecting the most relevant sensor modality to use within each sensor array for a particular application in said network and instructions for comparing a combination of said first response and said second response with combinations of responses of a particular analyte or mixture of substances that are known so as to identify an unknown analyte; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
